

# 275 kW

**VISIT US booth 525**

## World leader in **mid-scale wind turbines**

VERGNET is a **worldwide organization** with a long-standing reputation for proven, **reliable technology**, high-quality **products**, and impeccable **customer service** from inception through installation. We offer the highest performing turbines available in the mid-scale product range.

With more than **700 wind turbines** on six continents, VERGNET specializes in distributed generation or "community wind", enabling our customers to harness wind energy for their local energy and fiscal needs.

With more than **20 years of experience** in wind energy, we and our partners can help with your community wind project.

Rated power	275 kW
Power regulation	Pitch control
Hub height	180'
Rotor diameter	105'
Total weight	20 t
Foundations	15 m <sup>3</sup>
<b>Assembly</b>	<b>Self erecting</b>

Easy to transport

Easy to install

High performance
